pyry.lipiainen@taaleri.com

TAALERI

Joensuu Biocoal Ltd

- Taaleri Bioindustry's investment team has been involved in the site & technology selection, permitting, grant application, investment process and project management
- Joensuu Biocoal Ltd utilises torrefaction technology development by NextFuel. The production capacity of the biocoal factory is 60,000 tonnes annually
- Construction work began in Q4 2023, with initial ramp-up of production is currently ongoing
- The brownfield factory has been built next to the CHP facility of Savon Voima Oyj, a local energy company. The raw material purchases will be done jointly with Savon Voima Oyj, through a joint venture procurement company
