Market and Policy Update: Navigating Regulatory Change

Pierre-Jonathan Teasdale, Director
Natural Resources Canada, Canadian Forest Service

September 24, 2025
Wood Pellet Association of Canada Conference
Halifax, Nova Scotia

Canada

Roles of the Canadian Forest Service

Delivers science knowledge

Positions Canada internationally

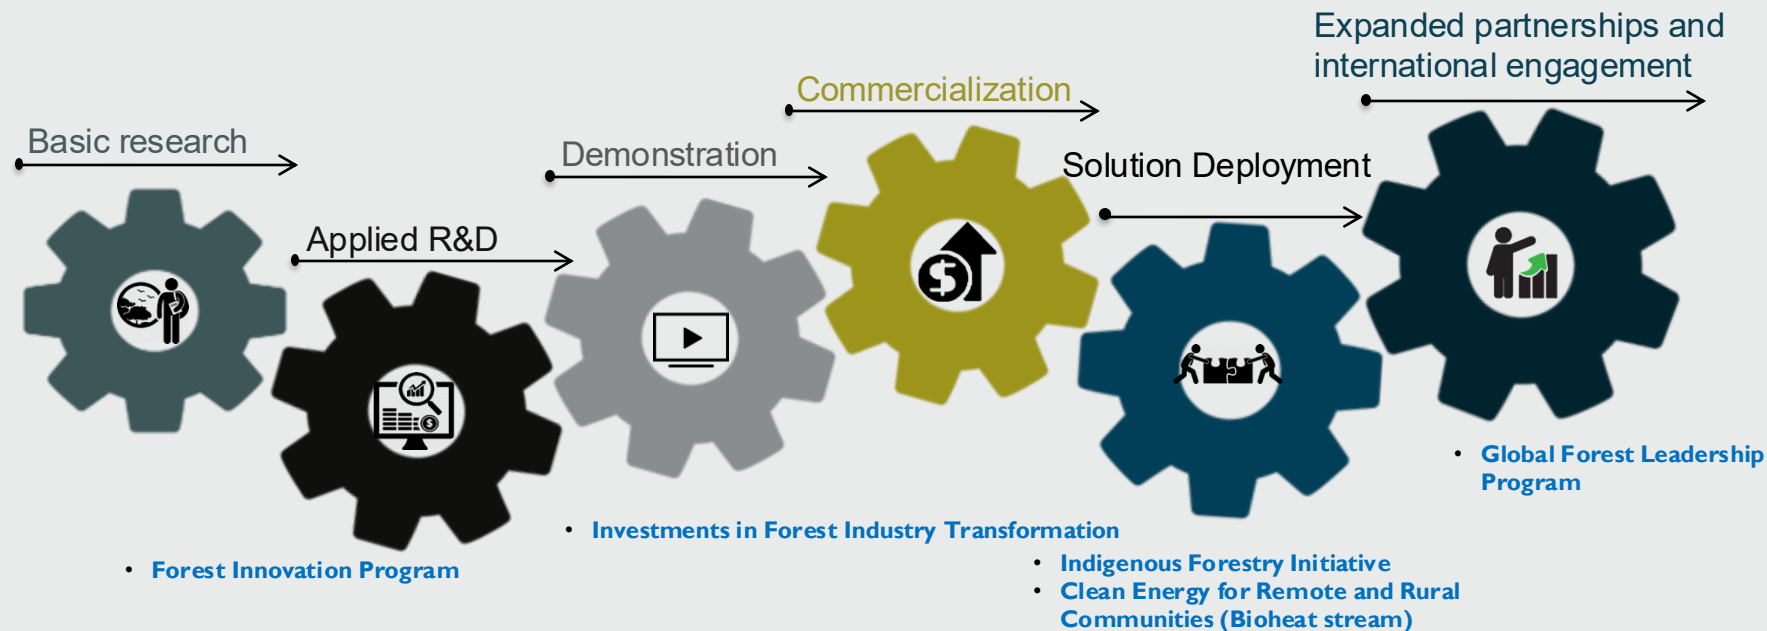

Collaborates to harmonize FPT policies (e.g. through CCFM)

Develops and delivers national policies and programs

Network of Regional Centres

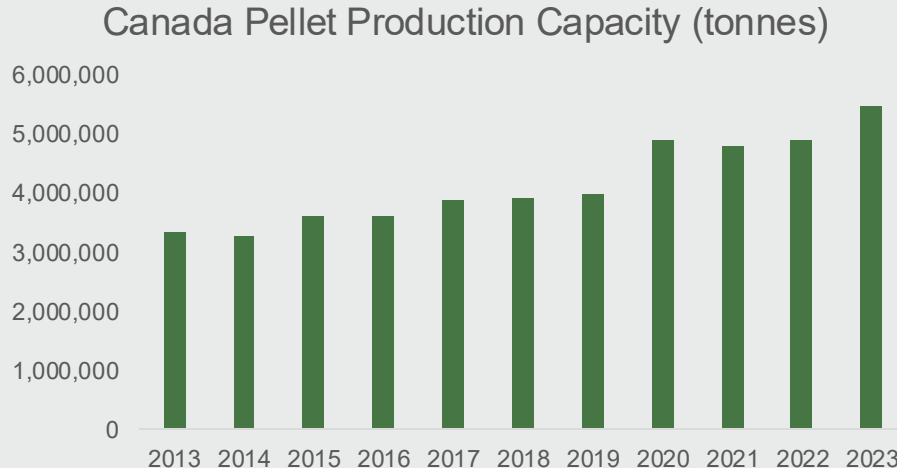

Supporting the bioeconomy from forest to market

Data-informed decision-making

NRCan-CFS Bioenergy and Bioeconomy survey

- Tracking changes and trends in:
 - Canada's wood pellet sector
 - Institutional and industrial use of wood for electricity and heat
 - Advanced bioproducts in Canada's bioeconomy

Supporting the sector more broadly

Collaboration across governments and industry

Across governments:

- National: provincial and territorial engagement
- Interdepartmental: ECCC, ISED, GAC, TC
- International: Global Affairs Canada missions and embassies

With industry:

- WPAC, QWEB
- Emerging industries

Data analysis for informed decision making

- Data tracking and modeling
- Economic analysis
- CFS bioenergy, bioheat and bioeconomy surveys

Science-based knowledge

- Forest & forest management research and analysis
- National Forest inventory
- Sustainable Forest Management monitoring and reporting

Support for policy, regulations & standards development

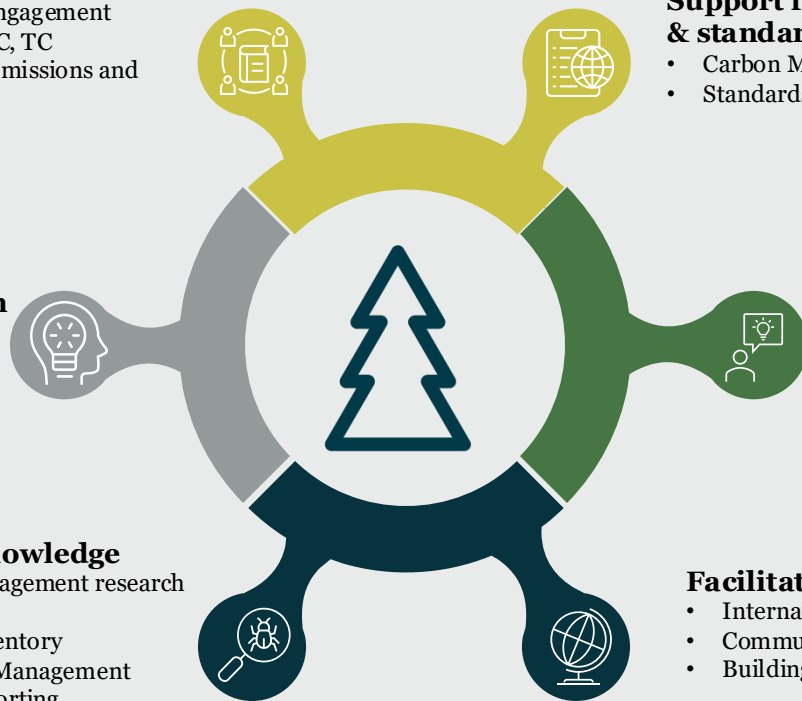

- Carbon Management Strategy
- Standards development with CSA and ISO

Funding programs

- Forest Innovation Program
- Investments in Forest Industry Transformation
- Indigenous Forestry Initiative
- Clean Energy for Remote and Rural Communities
- Global Forest Leadership

Facilitating market access

- International engagement and advocacy
- Communications and evidence-based SFM messaging
- Building awareness and understanding

Thank you.
